

CYBER SECURITY GUIDE

A vendor guide for MSPs

www.watchguard.com

WatchGuard® Technologies is a global leader in unified cybersecurity. Our Unified Security Platform® is uniquely designed for managed service providers to deliver world-class security that increases their business scale and velocity while also improving operational efficiency. Trusted by more than 17,000 security resellers and service providers to protect more than 250,000 customers, the company's award-winning products and services span network security and intelligence, advanced endpoint protection, multi-factor authentication, and secure Wi-Fi.

THREATLOCKER

<https://www.threatlocker.com/>

The team at ThreatLocker® has been developing cybersecurity tools for decades, including programs to enhance email and content security, and this is our most innovative and ambitious cybersecurity solution yet. We developed this unique cybersecurity system because we believe that organizations should have complete control of their networks and should not have to live in fear of the next malware attack.

<https://heimdalsecurity.com/>

One Platform.

Total Security for the United Kingdom.

Empower your security and IT teams with Heimdal's unified platform, built to defend against next-gen threats and provide comprehensive protection across multiple fronts. From endpoints and networks to emails, identities, and beyond, Heimdal has you covered with advanced detection and response capabilities.

<https://sendmarc.com/>

Using Sendmarc what arrives in an inbox is always the real thing. You and your reputation have guaranteed protection from impersonators, fraudsters and attackers. You can be fully confident that any email received bearing your identity has been verified as authentic.

Sendmarc identifies real email and stops fake emails so you don't have to worry.

<https://conceal.io/>

Preemptive Browser Security Against Cyber Threats

By intervening early in the attack sequence, our browser security solution, ConcealBrowse, significantly diminishes the risk of data theft, cyber extortion such as ransomware, and security breaches. This proactive disruption at the initial stages of the threat lifecycle is key to dramatically lowering the chances of successful cyber attacks.

<https://www.sophos.com/>

Why Sophos

Powered by threat intelligence, AI and machine learning from SophosLabs and SophosAI, Sophos delivers a broad portfolio of advanced products and services to secure users, networks and endpoints against ransomware, malware, exploits, phishing and the wide range of other cyberattacks. Sophos provides a single integrated cloud-based management console, Sophos Central – the centerpiece of an adaptive cybersecurity ecosystem that features a centralized data lake that leverages a rich set of open APIs available to customers, partners, developers, and other cybersecurity vendors. Sophos sells its products and services through reseller partners and managed service providers (MSPs) worldwide.

<https://www.keepersecurity.com/>

Visibility, security and control

Keeper®'s platform gives administrators the power to fine tune their organization's access levels to critical data and credentials across individuals and teams. Keeper uses role-based access control (RBAC) to support least-privileged access and tracks all user activity from every location and on every device.

<https://www.esentire.com/>

eSentire is The Authority in Managed Detection and Response Services, protecting the critical data and applications of 2000+ organizations in 80+ countries from known and unknown cyber threats. Founded in 2001, the company's mission is to hunt, investigate and stop cyber threats before they become business disrupting events.

<https://www.opentext.com/>

OpenText can help you tackle the most complex digital transformation programs with confidence. With the world's most complete and integrated Information Management platform, we empower our customers to organize, integrate and protect data and content as it flows through business processes inside and outside their organisation.

<https://colortokens.com/>

ColorTokens' enterprise microsegmentation platform gives you the peace of mind of knowing that your computing environment is always prepared for a breach--by design. With our Xshield platform, your critical business systems are protected by micro-perimeters, preventing the spread of malware or ransomware. We're dedicated to ensuring all your assets and applications are protected: IT, IoT, and OT, on-campus, in the cloud, or containers.rs. ColorTokens makes your organisation breach ready.
